What is the safest practice when creating passwords for online accounts?

- Create long, unique passwords for each account and store them in a trusted password manager
- Include personal details like your name and birthdate to make it memorable
- Use the same easy password on all accounts so you never forget it
- Rely only on your browser's auto-fill without any additional protection

You receive an unexpected email saying you have won a prize and must click a link to claim it. What should you do first?

- Examine the sender's address, hover over the link, and verify the message through official channels
- Ignore the email completely without checking anything
- Reply with your personal details to confirm your identity
- Click the link quickly before the offer expires
